Application No: 10/565,318

Filing Date : 02/01/2006

**For : METHOD AND DEVICE FOR ATTACHING
ADVERTISING MEDIA TO BOTTLES**

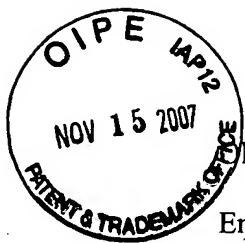

**First Named
Inventor : WOLFGANG HAASE**

To your message from 05/18/2007 (Art Unit 1734)

Enclosed will be a suggestion submitted for the new claims 1, 25 and 26, to take place instead of the existing claims 1, 25 and 26 and should take place for the following approval. Each new independent claim is refined to that effect that now mechanism are present to bring said caps or sealing parts within the disinfecting unit in such a position that their surface can be irradiated with ultraviolet radiation equably.

Furthermore it is refined that the sterilization will be execute by ultraviolet radiation. Such mechanism to bring said caps or sealing parts within disinfecting unit in such a position that their surface can be irradiated with ultraviolet radiation equably are not described on the quoted state of the art D1 til D3. Accordingly the items of the independent claims are based on a inventive work.

A adapted introduction to the description immediately will be given later as soon a consensus tenor for a wording of the claim is present.

Oliver Haensel

Enclosures : new claims 1, 25, 26

The existing claims 2 til 24 as well as 27 til 35 are kept unchanged maintained.

Best regards

ProScan GmbH
